

SAI KIRAN SATHPADI

Senior Software Engineer | Backend, Distributed Systems & Data Platforms

India (UTC+5:30) | sathpadisaikiran@gmail.com | [+91 83091 77006](tel:+918309177006) | [linkedin.com/in/saikiran-sathpadi](https://www.linkedin.com/in/saikiran-sathpadi) | github.com/saikiransathpadi | saikiransathpadi.github.io/portfolio-2026

Open to remote roles worldwide (full-time, contract/B2B or EOR) • Overlap with US/EU hours

SUMMARY

Senior Software Engineer with **6+ years** building event-driven backends and data pipelines in **Python on AWS**. Building a music catalog and ingestion platform for a US client (iHeartMedia) with FastAPI, RabbitMQ/Dramatiq, PostgreSQL, Kafka, AWS ECS and Terraform, while leading and mentoring the engineering team. Known for turning **multi-day jobs into hours**, cutting **query latency by 80%** and making services scale on demand; three years of remote delivery across time zones.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Go, Bash/Shell

Backend & APIs: FastAPI, Node.js, Express.js, Pydantic, SQLAlchemy, Django, Flask, REST, GraphQL, microservices

Messaging & Streaming: RabbitMQ, Apache Kafka (Avro), Dramatiq, Celery, AWS SQS, Amazon EventBridge

Data & Storage: PostgreSQL, Amazon Redshift, SQL Server, MySQL, OpenSearch/Elasticsearch, Redis, DynamoDB, MongoDB, AWS Glue (PySpark)

Cloud & DevOps: AWS (ECS, Lambda, S3, CloudWatch, IAM, AppSync, Cognito), Terraform (IaC), Docker, GitHub Actions, Jenkins, CI/CD

Observability & Quality: New Relic, OpenTelemetry, Logfire, Sentry, pytest, moto, mypy, security testing

Leadership & Practices: System design, event-driven architecture, technical leadership, mentoring, performance tuning, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Oct 2023 – Present

Techolution

Hyderabad, India (remote, US client)

Client: iHeartMedia (US) • Music catalog and ingestion platform

- **Lead and mentor the engineering team on the platform:** drive technical design, review pull requests, plan and estimate work with US stakeholders, and coach engineers to own features end to end.
- **Build and operate a 15+ stage, event-driven ingestion pipeline** (FastAPI, Dramatiq on RabbitMQ, PostgreSQL, Kafka/Avro) that validates, enriches, rights-checks, transcodes and publishes releases delivered by major record labels in DDEX format.
- **Cut a critical Redshift-to-PostgreSQL data migration from multiple days to ~2 hours** with partitioned, parallel bulk loads (dblink, CSV).
- **Reduced query latency by 80%** on metadata-matching services through query refactoring, targeted indexes and keyset pagination.
- **Made worker fleets scale on demand** by splitting heavy workloads into dedicated AWS ECS services and building CloudWatch step-scaling on RabbitMQ queue depth (up to 200 tasks), managed in Terraform.
- **Designed the data model and ETL for a third-party music-metadata integration:** PostgreSQL schemas, Alembic migrations, full and incremental loads, and fuzzy-matching workers for artists, albums, tracks, genres and images.
- **Delivered a major label's content-delivery integration end to end:** list and download workers, Redis distributed locks, delivery tracking and New Relic/Slack alerting through a custom-metric AWS Lambda.
- **Improved release safety** with a golden-file regression framework for AWS Glue (PySpark) export jobs in GitHub Actions CI, and shipped rights/publishing features including per-licensee takedowns and a DDEX ERN 4.3 upgrade.

Software Development Engineer I

Jun 2021 – Sep 2023

Bijak (Krishnacharya Tech Pvt. Ltd.)

Gurugram, India

- **Architected and built a serverless mobile-commerce backend from scratch** (AWS Lambda, AppSync/GraphQL, DynamoDB, Cognito, EventBridge, S3) that served **10,000+ users in launch week**.
- **Reduced API and query latency by 55–70%** with Redis caching and database connection pooling.
- **Built automated payment reconciliation** that flags missing and delayed payments, reducing operations effort by 60%.
- **Delivered stock-management and order-feedback features end to end** in Agile sprints, ran security testing (SQL injection, data leakage) and mentored interns who converted to full-time roles.

Software Development Engineer I • Full-Stack Developer Apprentice

Sep 2020 – Jun 2021

The10xAcademy (BDFL Technologies Pvt. Ltd.)

Hyderabad, India

- **Co-led the technical curriculum and mentoring for a coding bootcamp**, contributing to a 90% placement rate; promoted from apprentice to SDE I in six months.
- **Built features for an ed-tech platform** using Go and React.

EDUCATION

Bachelor of Technology (B.Tech), National Institute of Technology (NIT) Calicut, India

2016 – 2020

Domains: Media & music streaming, E-commerce, EdTech | **Languages:** English (professional), Hindi, Telugu
